

Discharge Summary

Patient Name: John Doe

Age: 65

Gender: Male

Admission Date: 2025-07-15

Discharge Date: 2025-07-20

Diagnosis: Community-acquired pneumonia

Hospital Course:

The patient was admitted with complaints of fever, productive cough, and shortness of breath. He was diagnosed with pneumonia based on chest X-ray findings and elevated white blood cell count. He responded well to IV antibiotics and supportive care.

Discharge Medications:

- Azithromycin 500mg once daily for 3 days
- Paracetamol 500mg as needed for fever

Follow-up:

Visit Pulmonology OPD after 7 days.
